## Work Experience

### Daffodil Software Pvt. Ltd.

Associate Software Engineer

Haryana

01/2022 – Present

- Spearheaded the development of **reusable components** compatible with React and React Native, resulting in a **40% reduction in development time** and improved cross-platform development efficiency.
- Contributed to successful delivery of **6 major projects**, including Locomo, which is seamlessly used by **3,500+ users**.
- Collaborated closely with cross-functional teams including project managers, designers, Business Analyst and QA teams, ensuring **timely delivery of software projects** and meeting coding milestones.

## Projects

### Unthinkable UI | TypeScript, ReactJS, React Native, NextJS, Tailwind CSS, Inline CSS

01/2022 - Present

- Designed and launched Unthinkable UI, a comprehensive library of over 20 components leveraging React and React Native; accelerating project ramp-up time by 40% within the first quarter.
- Implemented custom hooks to efficiently manage states, incorporated multiple theme support, and data fetch support for enhanced customization.
- Streamlined development by enabling the use of the same codebase for both web and app development using React and React Native within the same application, reducing development time by upto 40%
- Facilitated project setup by merging package JSON files of React and React Native apps, resolving multiple dependencies and npm packages.

### Townkart | NextJS, Tailwind CSS, NativeWind, NodeJs, Mongoose, MongoDB

11/2024 – Present

- Developed a comprehensive platform for fashion shops, enabling shop owners to create and launch customized websites **within 2 hours**, all hosted on our domain.
- Implemented a complete **front-end and back-end** solution, including responsive product listing pages with category grouping, product detail pages, and a fully functional checkout process.
- Utilized **Tailwind CSS** and **NativeWind** to enable responsive styling for both web and mobile applications, cutting styling time by 50%.
- Configured Next.js for a seamless integration of web and native platforms, leveraging Tailwind CSS for flexible styling and cross-platform compatibility.

### Locomo | ReactJS, CSS, Styled Components, NodeJs, Mongoose, MongoDB

08/2023 – 11/2024

- Conceptualized and developed Locomo, a multifunctional platform combining ERP functionalities with a robust Project Management Tool (PMT), offering customized options to clients.
- Engineered advanced task management features, optimizing project workflow and automating task creation based on feature mappings, boosted project management efficiency by up to 80%.
- Designed intuitive graphical representations of database relationships and screen connections in Locomo, enhancing data visualization and user understanding, improving workflow efficiency by up to 70%

## Achievements

- Honored with **company's highest award** for outstanding contributions to successful delivery of Locomo.
- Ranked in the **top 5** for exceptional performance in the **company-wide excellence competition** among **1,200+ employees**.

## Technical skills

**Language/Frameworks:** JavaScript, C/C++, Python, SQL, ReactJs, React Native, NextJs, NodeJs, ExpressJs, Mongoose, MongoDB, Restful APIs, Firebase, NativeWind

**Dev Tools:** Postman, GitHub, BitBucket, Visual Studio Code, Android Studio

**Coursework:** Data Structures, Algorithms, OOPS, DBMS, System Design

**Soft Skills:** Product Design, Communication, Leadership, Mentorship, Team-Coordination

## Education

### Jaipur National University

BTech. in Computer Science Engineering

08/2018 – 08/2022

Jaipur, Rajasthan
